# AKASH BHANDWALKAR

Senior Software Developer

To whom may it concern,

I am writing this to express my interest in the Front end developer position in your organization.

I have total 6.8+ years of experience in developing and improving web applications. I have experience working on various web domains as eCommerce, education, entertainment. Over the years of the period I have worked on HTML, CSS, JavaScript, ReactJS, Redux and I hold expertise into them. I have had opportunities to work on Angular and Nodejs for short period of time. I am currently exploring Nextjs and tailwind css framework.

I honestly feel I match the skillsets required to given role and my learning and honesty can bring positive energy to team.

I would like to talk more on opportunity and looking forward to talk to you.

Thank you and Regards,  
Akash Bhandwalkar,
